

The Range

Who we are

Mossman Trunks is a wholly owned subsidiary company of 5 Star Cases Limited, a leading manufacturer of specialist cases to a wide variety of applications and industries. For thirty years, 5 Star Cases has gained considerable experience in this field. This has been achieved in various ways. Firstly, its commitment to training its employees. All our staff, from Production, Administration, Technical or Sales, take pride in what they do. Secondly, continued investment in machinery, IT systems and software, training equipment and property facilities.

All these facilities and departments are available to view by appointment and we welcome potential customers to visit our premises, to see how we operate. Mossman Trunks was acquired in 2001 and now forms part of 5 Star's product portfolio. The method of manufacture has by and large, remained unchanged for many years.

They are manufactured from quality plywood to which has been bonded a covering of either PVC or Aluminium. The plywood panels are assembled with either PVC or Aluminium edging and extrusions using special bifurcated rivets producing a permanent and durable fixing. External hardware such as protective corners, handles and hinges are riveted. The majority of these fittings are Brass or Silver effect plating.

Celebrating 30 years. 1981-2011

a 5 Star Group Holdings Limited company

TRADITIONAL RANGE ST415 TB415

TB7034C	20 x 13 x 11	4.5kg	47	Unlined
(As above with cabin lock)				

Spare keys are available for the cabin and standard locks. Supplied in 10's

Instructions for applying Vinyl Lettering

Your Vinyl Lettering arrives to you with three layers

1. The top layer is the application tape.
2. The middle layer is the vinyl lettering or graphic.
3. The bottom layer is the backing paper.

The surface must be thoroughly cleaned and free of all oils, waxes, dust and dirt, your tuckbox / trunk will have been polished, please make sure you wash & dry the surface you want to apply your vinyl to. With the application tape side up, use a cloth to wipe over the whole of the lettering using plenty of pressure. This will stick the lettering to the application tape and release it from the backing paper.

Place the lettering on the surface. Make sure you stick it in the right place as it cannot be removed without damaging the lettering. Use a wide strip of masking tape to stick the top edge to the surface. This becomes a hinge. Lift the lettering, pull back the top section of the backing paper using the cloth and light pressure. Start from top centre and with horizontal strokes, apply the vinyl. Carry on this way removing sections of backing each time.

Leave for 10 minutes.

Once you are sure the vinyl is securely attached to the surface, remove the application tape diagonally at a 180° angle back over itself then rub entire graphic with a soft cloth paying particular attention to the edges. Bear in mind that the vinyl takes a couple of weeks to fully mature so handle with care.

Exterior colour options

Colour swatches shown here are to be taken as a guide only, due to printing constraints

Introducing the new Backpack from Mossman®

To compliment the range of popular school and luggage trunks, Mossman® launch the first in a series of quality bags starting with this versatile backpack.

Manufactured from high quality water resistant Nylon 900D, in a simple but striking two-tone black and grey finish with a light grey internal lining. Foam padded and reinforced lining for extra protection.

Four zipped compartments to accept a host of items. Laptops and Notebooks up to 15" and plenty of room for cables and accessories.

Twin adjustable shoulder straps which are padded for additional comfort. Two water bottle holders are also included, making a very versatile backpack for kids and business users alike.

Approximate external dimensions due to the flexibility of the bag.

Width - 350mm
Height - 440mm
Depth - 135mm

Empty weight - 625g
